EDUCATION

Carnegie Mellon University

Master of Information Systems Management (MISM)

- **Achievement:** Recipient of 25% Merit Scholarship

Aug 2026 - Dec 2027

Pittsburgh, USA

Vishwakarma Institute of Technology, Pune

B.Tech Electronics and Telecommunication, Electronics and Telecommunication (GPA: 3.92)

Semester Exchange: Hof University of Applied Sciences, Germany (Computer Science)

- **Achievement:** Achieved perfect 1.0 grade in master's-level Data Engineering and Analysis course during exchange program.
- **Publication:** IEEE Developing Complex Full Stack Java-Based Spring Cloud Applications; ISBN: 978-93-87793-46-0.

Aug 2018 - Jun 2022

Pune, India

SKILLS & CERTIFICATIONS

- **Programming Languages:** Java, Typescript, JavaScript, Python
- **Frameworks And Platforms:** AWS, Databricks, GraphQL, Spring Boot, React
- **Analytics And Collaboration:** DataDog, Jira, Figma, Agile/Scrum, Document Analysis, AI/LLM Tools, Confluence, SharePoint

SKILLS & CERTIFICATIONS

- Scrum Foundation Professional Certificate (SFPC)
- Agile Scrum Master (ASM®)
- Design Thinking
- Six Sigma White Belt Certification
- Fundamentals of Databricks Lakehouse Platform
- The Data Scientist's Toolbox

EXPERIENCE

Nutrien India Digital

Software Engineer

Pune, India · Oct 2025 - Jul 2026

- Led engineering execution in a 2-day AI DLC sprint with Product and UX, translating a PRD into a production-ready feature using Kiro and AI agents while refining the requirements flow from concept to implementation.
- Led end-to-end execution of a compliance-critical feature by translating business requirements into detailed PRDs and user stories, prioritizing engineering work, and aligning Product, UX, and Backend teams to deliver a seamless user experience that proactively prevented invalid workflows.
- Evaluated technical feasibility, negotiated scope and delivery timelines with cross-functional stakeholders, and drove engineering trade-off decisions to balance implementation complexity, user experience, and release commitments while maintaining comprehensive test coverage.
- Championed unit testing practices in the team's MFE package, authoring extensive tests to raise code coverage from 47.3% to 77.9% and establishing ongoing contributions from team members to sustain growing coverage metrics.
- Identified opportunity to scale engineering best practices; equipped QA with Apollo Client and comprehensive schema validation playbook, establishing self-service testing capabilities that improved release quality and cross-functional collaboration.

Associate Software Engineer

Pune, India · Jun 2023 - Oct 2025

- Diagnosed critical performance bottleneck affecting user retention; improved planning feature performance by 70% (17s to 4s load times) through virtualization, React optimizations, and GraphQL API improvements that reduced response times by ~5s, directly enhancing user experience for enterprise clients.
- Drove a structured planning initiative to reduce rework by leading the end-to-end breakdown of 27+ feature tickets, aligning product, design, and engineering early to create clearer requirement baselines and near-zero iteration.
- Identified technical debt impacting development velocity; streamlined UI components by 40% through strategic design of reusable modules, accelerating feature delivery by 30% and enabling faster response to market demands across multiple product lines.

John Deere India

Graduate Engineer Trainee

Pune, India · Jul 2022 - Jun 2023

- Spearheaded 2 John Deere Global Hackathons as junior engineer by automating 500M+ data point reporting with Databricks EDA; solution was productionized department-wide, eliminating manual processes and enabling data-driven decision making.
- Architected fault-tolerant data pipelines processing 150M+ records daily using PySpark and Hadoop; achieved zero data loss through custom integrity algorithms, reducing downstream errors by 95% across 5+ teams and ensuring reliable analytics.
- Designed reusable integrations and monitoring solutions adopted across 10+ teams, reducing issue resolution time by 40%.

Software Development Intern

Pune, India · Aug 2021 - Jun 2022

- Developed a Java, Spring Boot, and AWS SQS/SNS/Lambda-based information management tool during internship, tracking 50K+ daily KPI metrics and reducing report generation time by 30% for 50+ Intelligent Solutions Group users.
- Pioneered cross-account and cross-region data ingestion with AWS Lambda, slashing pre-data transfer setups by 50% for 30+ users, presented to 150+ members, driving adoption across multiple teams.

LEADERSHIP & IMPACT

Nutrien India Digital

- Scaled team from 5 to 30 members by creating onboarding framework that accelerated new-hire productivity and supported expansion.
- Awarded 2nd place in a company-wide innovation challenge for delivering a data directory that streamlined cross-departmental operations.

John Deere India

- Mentored 8 interns as one of youngest team members, achieving 100% full-time conversion rate.
- Led enterprise DEI initiatives reaching 500+ employees through published content, awareness sessions, and engagement programs.

Community Engagement

- Mentored 5+ underprivileged students, providing guidance on career pathways and access to educational resources.
- Volunteered with VIT Social Welfare Program, teaching and mentoring parentless children to support their personal development.
